- LIQUIDY POOL

As we all know to have a have a continues increase of token usage, the token itself must have it own usage instead of reinvent the wheels we are focusing on working with the service provider to accept the token as main currency itself. As example a reseller of in apps currency are accepting HOMEMARS TOKEN instead of FIAT currency, this will give a boost to the value of the token itself with community driven usage.

AT THE LAUNCH, TOKEN WILL BE DIVIDED INTO 4 ACTIVITIES AS BELOW :

TOKENOMIC

TAX METRICS FOR BUY & SELL	%
TOKEN REFLECTION	4%
DEPRECIATING SUPPLY & BURN	1%
MARKETING WALLET	3%
LIQUIDY POOL	2%

Token Reflection

A hold-farming reward structure different with conventional farming that are more costly and involving manual transfer to obtain reward. The smart contract function will automatically distribute the reflection to all holder without additional fee.

Longer holding period = more reflection received. The Best thing is we are giving THE HIGHEST REFLECTION TO HOLDER with less total tax impose.

Depreciating Supply & Burn

With distributing tax to the burn address, consistent burning will occur. Burning does not often lead to an immediate asset's value appreciation, as it often destroys coins that have not been in circulation for a long time.

As the demand for coins increases over time, this can contribute to significant growth, and updating the previous highs can be achieved much faster. This will be executed manually to assist control of price fluctuation

Automatic Liquidity Pool

Automated liquidity supply will ensure that there always has enough token to perform transaction without any high price impact or insufficient supply in markets.

What's make HOMEMARS different ?

Partnership Benefit

For those that selected as partner will get 2% reward from total transaction for the service that they offer to HOMEMARS USER.
